SUMMARY

Product-minded operator with five years in the CEO offices of Amazon (Andy Jassy) and Microsoft (Satya Nadella) and a graduate of Microsoft's two-year ACE rotational program. Turns user discovery into shipped systems: scoped and launched a seven-agent AI system from 25 stakeholder interviews, cut a recurring workflow's update time by 80%, and designed the research that set the Copilot feature rollout order. Strongest where prioritization criteria do not yet exist and must be defined.

EXPERIENCE

Amazon

Seattle, WA

Communications Specialist, CEO Communications, Global Corporate Affairs

June 2026 – Present

Executive communications and operations for the CEO

- Launched a seven-agent AI system on Amazon Quick Suite within eight weeks of joining, automating intake extraction, triage, first-draft briefings and knowledge retrieval across 200+ engagement items.
- Scoped the system from 25 discovery interviews with product managers, engineering managers and comms and PR leads, and designed it around the key constraint discovery surfaced: no platform write APIs.
- Defined the first evaluation criteria for the CEO's external engagement portfolio; own intake and prioritization across 200+ requests and deliver a weekly decision update to senior Corporate Affairs leadership.
- Led a three-week build-vs-buy evaluation of media monitoring, running a self-built pipeline alongside the incumbent agency feed; benchmarked coverage, volume and false positives and presented a recommendation to leadership.
- Designed a four-gate milestone tracking model and weekly operating cadence, replacing an open-ended status meeting with an agenda-driven review that shows week-over-week progress.
- Scaled AI adoption as the team's designated AI champion, turning one-off automations into documented team workflows.

Microsoft

Redmond, WA | August 2021 – June 2026

Business & Communications Manager, Security Marketing

March 2025 – June 2026

Executive staff role to the Corporate Vice President, Security Marketing

- Cut per-engagement update time by 80% by building an AI-powered CVP Engagement Tracker in Power Automate and AI Builder that consolidated three siloed manual workflows into one.
- Established the Security Launch Council, a governance framework aligning engineering, marketing and business planning on shared launch criteria and monthly prioritization.
- Led organization-wide AI enablement as a structured change program, including a rollout plan, baseline adoption surveys, a 200+ resource playbook and an enablement channel reaching 12,000+ employees.
- Owned the six-week all-hands cycle, from agenda and executive content to production, and led the Security Marketing offsite.

Research, Insights & Communications Manager, Office of the CEO

October 2023 – March 2025

- Led a team of 5 producing the weekly CEO Board of Directors Update, turning news coverage, product milestones and industry signals into decision-ready reporting for senior leadership.
- Managed a team of 8 building automated CEO keynote dashboards; real-time analytics informed live communications pivots.
- Coordinated 60+ executive briefing documents for CEO country visits with regional and cross-functional teams.

ACE Rotation Program — selective two-year Microsoft rotational program; the two roles below are its one-year rotations.

Product Marketing Research Manager

September 2022 – September 2023

- Designed the Gen Z AI Feature Prioritization study and translated its findings into the feature sequencing for the Copilot rollout.
- Led 3 large-scale quantitative and qualitative studies on Gen Z productivity behaviors with 100,000+ participants.

Product Marketing Manager, Azure

August 2021 – August 2022

- Launched the Azure SaaS Guide with its go-to-market plan and messaging framework, generating thousands of partner engagements; directed 6 vendors to deliver 30+ customer case studies.

LEADERSHIP & COMMUNITY

- **Board Member, Muslims for Progressive Values** — Lead grant strategy and fundraising, including the cultural center capital campaign.
- **Commissioner, Seattle Renters' Commission** — Advised City Council on renter protections; helped appoint most of the Social Housing board.

SKILLS

- **Product:** User research, prioritization frameworks, launch governance, success metrics, roadmapping, cross-functional leadership
- **AI & Technical:** Agentic workflow design, Amazon Quick Suite, Power Automate, AI Builder, Power BI, SQL, Python, R, STATA, Figma

EDUCATION

The University of Chicago — B.A., Public Policy

Chicago, IL | September 2017 – June 2021

Coursework: Stanford (Product Management; Ethics & Technology Policy); Kellogg (Marketing); Harvard Extension (Project Management)
